What’s happened since Sibiu 2008?
IWRM-Net in a nutshell

Who are we?
Open network of research programme managers (IWRM) composed of 21 members from 14 members states

Our aims, in the context of WFD implementation

- A forum for prospective and co-ordination of research needs and programmes

- The facilitator between researchers and water policy makers and managers to bridge the communication gap.
How IWRM-net works

Identification of needs

Dissemination and communication of knowledge

Running the research programmes
Second call

- Climate change impacts and adaptation for IWRM
- Water Scarcity and Droughts
- Economics for IWRM: Social and Environmental Evaluation for decision making and Incentive measures to regulate uses

30/09/2010

Stephen Midgley
The projects

- **ESAWADI**
  - It aims to analyze and provide advice on the potential usefulness of the ecosystem services approach (ESA) to support the implementation of the European Water Framework Directive (WFD) economic requirements.

- **WATER2ADAPT**
  - Resilience enhancement and water demand management for climate change adaptation. (Italy, Germany, Spain, Portugal)

- **Water Cap & Trade**
  - Water Market scenarios for Southern Europe: new solutions for dealing with water scarcity and drought risk. (France, Italy, Spain)

- **Climate Change**
  - Impacts of climate change on water resources management - regional strategies and European view. (Germany, France, Italy)

- **IMPACT**
  - Developing an integrated model to predict abiotic habitat conditions and biota of rivers for application in climate change research and water management. (Germany, Portugal, France)

- **ICARUS**
  - IWRM for climate change adaptation in rural social ecosystems Southern Europe (Italy, Portugal, Spain)
Scientific Coordination Project

- Interface between projects, funders and wider partners
- Create synergies among projects, partners and wider
- Support the dissemination (including to potential users)
Join our network of experts to discuss and exchange ideas on groundwater and groundwater-dependent ecosystems.

At the HydroEco conference in Vienna, Austria, 2 to 5 May 2011 we organize a special session on interactions between groundwater and associated groundwater-dependent aquatic and terrestrial ecosystems. Read more...

Rejoignez notre réseau d'experts pour discuter et échanger des idées sur les eaux souterraines et leurs écosystèmes dépendants des eaux souterraines.

A la conférence HydroEco à Vienne, Autriche, du 2 au 5 mai 2011, nous organisons une session spéciale sur les interactions entre les eaux souterraines et leurs écosystèmes dépendants des eaux souterraines. Lire la suite...

Caroline Buckle, 6y 2m
Bonjour, je vais arriver dans le groupe.
Masquer

Stephen Neild, 6y 2m
The ScAMP project has monitored wetlands in England over the past 5 years. Attached is a summary of findings. For more info contact me...

Masquer
1st - 3rd December 2010
Bedford Hotel, Brussels

First joint call:

Joint Programming Initiative (JPI)

CIS SPI
Thank you for your attention
