# Implementation stage of the 2000/60/EC Directive and 2007/60/EC Directive in Romania

## 11th EURO INBO Conference

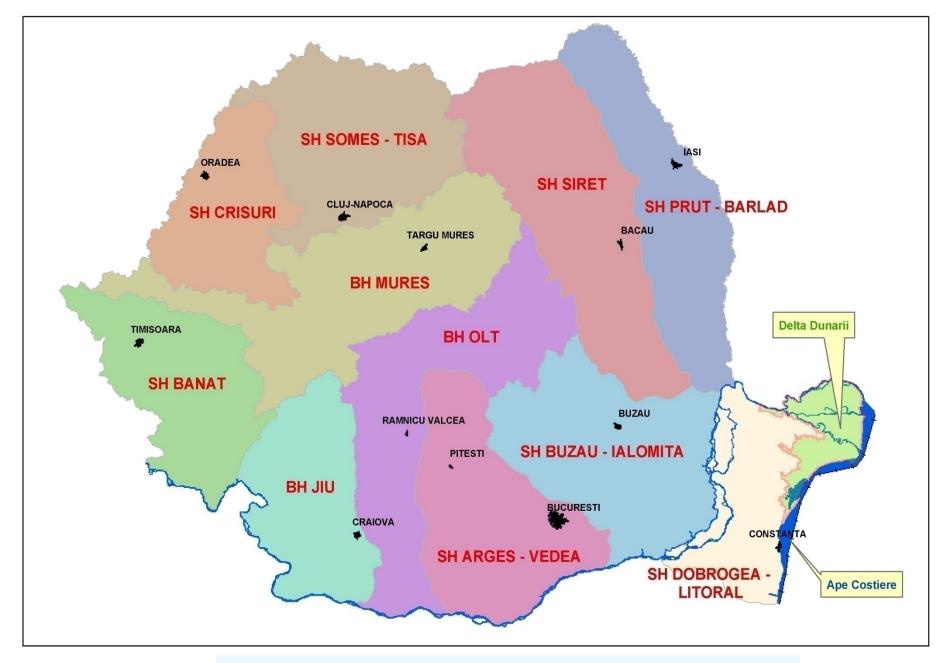

Plovdiv –Bulgaria 14 November 2013

#### Danube River Basin District. Overview map

#### Implementation of WFD and FD in Romania

- > **Legal**: Water Law 107/1996
  - → amended and completed by the Law 310/2004, Law 112/2006, OUG 3/2010, Law 146/2010 for transposition of the Water Framework Directive 2000/60/EC and of the Floods Directive 2007/60/EC
- Organizatorical:
  - Ministry of Environment and Climate Change, Department of Water, Forests and Fisheries
  - National Administration "Apele Romane"
    - 11 River Basin Administrations
    - National Institute for Hydrology and Water Management
- **Consultative**: River Basin Committees

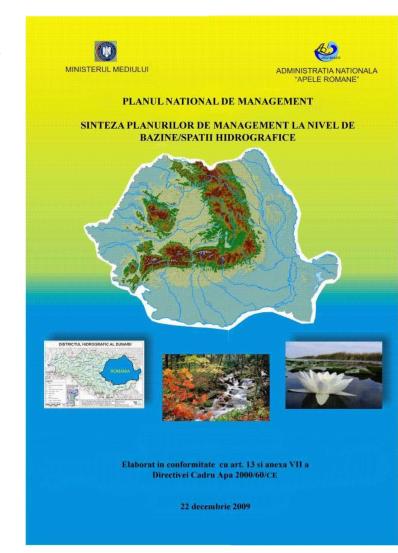

River basins /sub-units in Romania

## Implementation of WFD in Romania (1)

- ✓ 2004: Characteristics of the river basins and review of the environmental impact of human activity; Economic analysis of water uses
- **2006**: Defining of monitoring networks and implementation of the monitoring programs
- **2007**: Identification of significant water management issues at the river basin level
- ✓ 2008 2010 : Elaboration, approval and reporting of the first River Basin Management Plans and of the first National Management Plan

#### **First National Management Plan**

- □National Management Plan represents the synthesis at the national level of 11 River Basin Management Plans (RBMPs)
- □Elaboration at 22 December 2009
- □RBMPs were presented and approved in the River Basin Committees
- □ Reporting to EC: 22 March 2010
- □ Approved through Governmental Decision 80/2011 after Strategic Environmental Assessment procedure

## Implementation of WFD in Romania (2)

✓ 2012 : Elaboration and reporting of the Interim Report on the Programs of Measures implementation

## On going activities - 2013

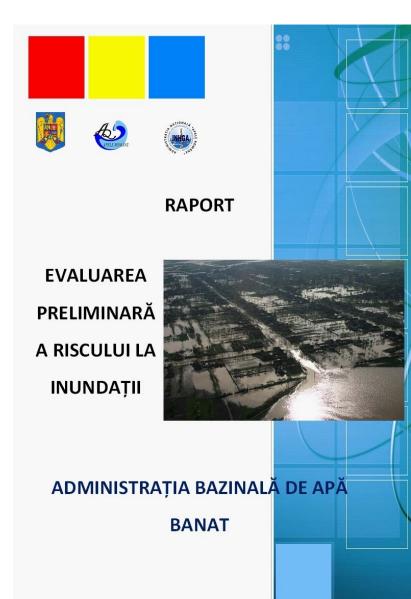

- Update of characteristics of the river basins, review of the environmental impact of human activity and economic analysis of water uses
- Interim overview of significant water management issues at the river basin level

### **✓** Future activities: 2014 – 2016

Elaboration, approval and reporting of the second River Basin Management Plans and of the second National Management Plan

## Implementation of FD in Romania (1)

- **2010 2012 : 1<sup>st</sup> stage of FD** implementation − Preliminary Food Risk Assessment − finalised
  - Collect and analyze information on historical floods within an unitary template from RB Authorities at NIHWM level
  - PFRA and APSFR
    methodologies unitary
    scientific approach at
    national level guided by
    NIHWM N.A. Apele Romane

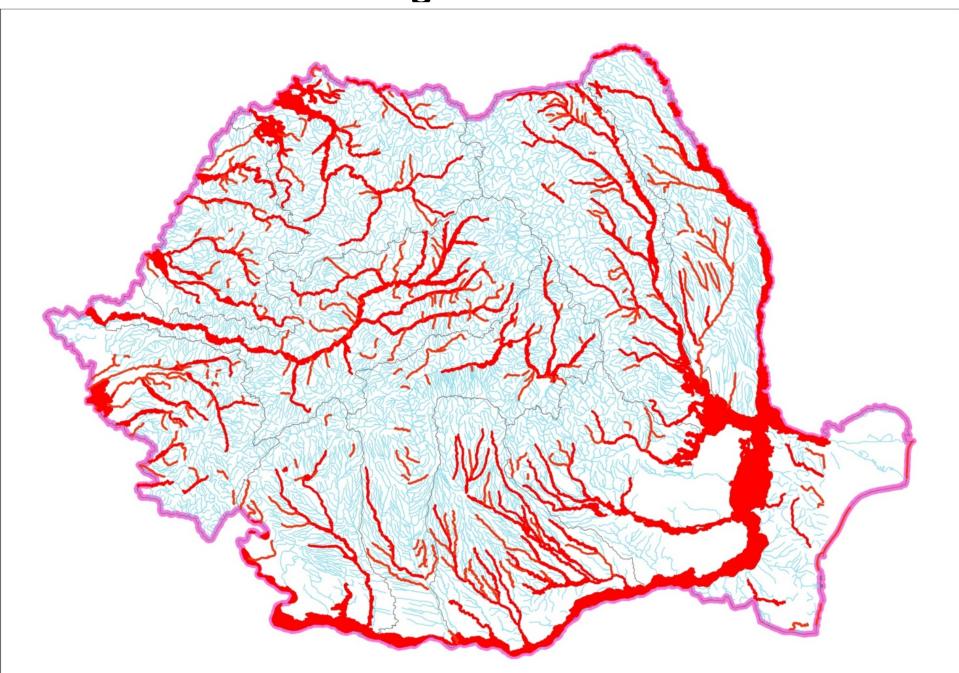

## PFRA and APSFR methodologies

- Overall Approach
- Past Adverse Consequences
- Significant Adverse Consequences
- Potential Adverse Consequences
- ▲ Long Term Developments
- ♦ Issues Article4\_2\_d
- International Information Exchange
- Fatalities Description
- Summary of Methodology
- Summary of Coordination

### **Areas with Potential Significant Flood Risk – APSFR**

## Implementation of FD in Romania (2)

✓ March 2012: Reporting to EC - Provided information: GIS maps, data, methodologies, uploaded on EIONET site

2010

 competent authorities and coverage of the River sub-basins/sub-units for the elaboration of the FRMP

PFRA

- 39 events at national level
- 22.03.2012 3 events for Danube

APSFR

22.03.2012

375 Areas with Potential Significant Flood Risk.

## Implementation of FD in Romania (2)

Feb. 2013 Request of clarification from the EC

The full reports underpinning the assessments

Information on where the PFRA is made publicly available for RB Districts (web-link) as required by Art. 10 of the FD

On-going activities

Flood Hazard maps – result of the on-going Programme National Plan for floods prevention, protection and mitigation (financed through state budget / H.G. 1309/2005 and Env.SOP)

Future activities

Flood Risk maps

#### **Difficulties (exemples):**

■ WFD

Establishing the link between hydromorphological indicators and ecological status.

## FLOOD Directive

Availability of hazard maps <u>for all APFSR</u> defined and reported to EC (areas without hydraulic modelling at this stage!)

Vulnerability data availability – qualitative approach for risk assessment for the 1<sup>st</sup> cycle of reporting.

## Thank for your kind attention!
