	Consultation of the Strategic Environmental assessment of the RBMP	Consultation of the Strategic Environmental assessment of the RBMP

## **SOME LESSONS LEARNED**

**It is very important to start this consultation as early as we could**

**The most effective were local meetings**

**It is good to reach as many stakeholders as we could**

**To reach more people and young people it is good to use more modern tools like social networks as facebook, ...**

**Need to improve the representation of different group of stakeholders in Basin council and its role for the river basin management**

**Work with young people is essential in long term to change habits and sensitivity of society to water problems**

## **Youth Water Parliament**

Include young people  
as a stakeholder group  
in the consultation for  
RBMP and FRMP

Parallel meeting for  
public consultation  
with young people

**THANK YOU FOR YOUR  
ATTENTION!**
