How digital solutions can contribute to the implementation of EU water policies?

Workshop Etiquette

- For the introduction part, you can choose French, Spanish or English language
- Please keep your micro turned off
- You can use the chat to address your questions to the speakers as well as technical issues
How digital solutions can contribute to the implementation of EU water policies?

09 December 2021

Expected outcome

- Provide evidence based digital water solutions and highlight how they can support water management and EU water policies

Objectives

- Provide an overview of the water digital solutions
- Discuss how these solutions can support water management and EU water policies
  - Path towards digital solutions: from the needs to the possibilities
  - The role of the socio-political engagement to implement digital solutions
Setting the digital water scene

**Digital water challenges for river basin organisation**
Eric Tardieu, INBO

**Welcoming**
Manuel Sapiano, Water Director of Malta

**Key messages from the French Biodiversity Agency**
Hélène Loiseau, OFB

**What is digital water?**
Lluís Echeverria, EURECAT

**Focus on Fiware4Water digital solutions**
Lydia Vamvakeridou-Lyroudia, KWR, University of Exeter

**Chairperson, Fiware4Water Communication and Dissemination leader**
Natacha Amorsi, OiEau
Working session #1
Path towards digital solutions: from the needs to the possibilities

Panorama of digital water solutions
Sonia Siauve, OiEau, @Fiware4Water Coordinator

Digital solutions for water managers and their policy relevance
Nicolas Caradot, KWB, @Digital Water.City Coordinator
Discussion

• What are your needs for digital solutions?

• Which barriers and obstacles are you facing for the up-take of digital solutions?

• Which recommendations would you like to share to facilitate the access to digital solutions?
Working session #2
The role of the socio-political engagement to implement digital solutions

Local Water forum
Richard Elelman, EURECAT

Feedbacks from the Local Water Forum established in UK
Kate Baker, University of Exeter

How digital solutions can contribute to the implementation of EU water policies?
09 December 2021
How digital solutions can contribute to the implementation of EU water policies?
09 December 2021

Discussion

• How to use Local Water Forum in River Basin Management Plan development and implementation?

• Which recommendations to facilitate the involvement of basin actors with digital solutions?
Closing

What’s next, the results of the workshop will be made available. At the scale of Fiware4Water, they represent precious materials that will benefit to various activities such as the exploitation plan. Fill free to contact the speakers and Fiware4Water partners for more details. We will keep posted on the latest development that could be of interest for water managers.
