Scaling up implementation of Nature-based Solutions for water: casus Suriname water-biodiversity

Dr. Riad Nurmohamed, Minister of Public Works, Suriname
Scaling up implementation of Nature-based Solutions for water: casus Suriname water-biodiversity
Scaling up implementation of Nature-based Solutions for water: casus Suriname water-biodiversity

*Green dyke and mangroves*

- High biodiversity along mangroves: beekeeping, breeding ground for aquatic species (fish, crabs, shrimps etc), feeding ground for various species such as birds, etc
- Cheaper natural technology (environment friendly)
- Create long term employment
- Secure food (protein) source
- etc
