100 000 km²

17 million inhabitants
in 2% of the basin area

69 000 km of rivers

40 % of national industrial activity
60 % of the basin is cultivated areas

Our guideline : the Water Framework Directive (WFD - 23/12/2000)

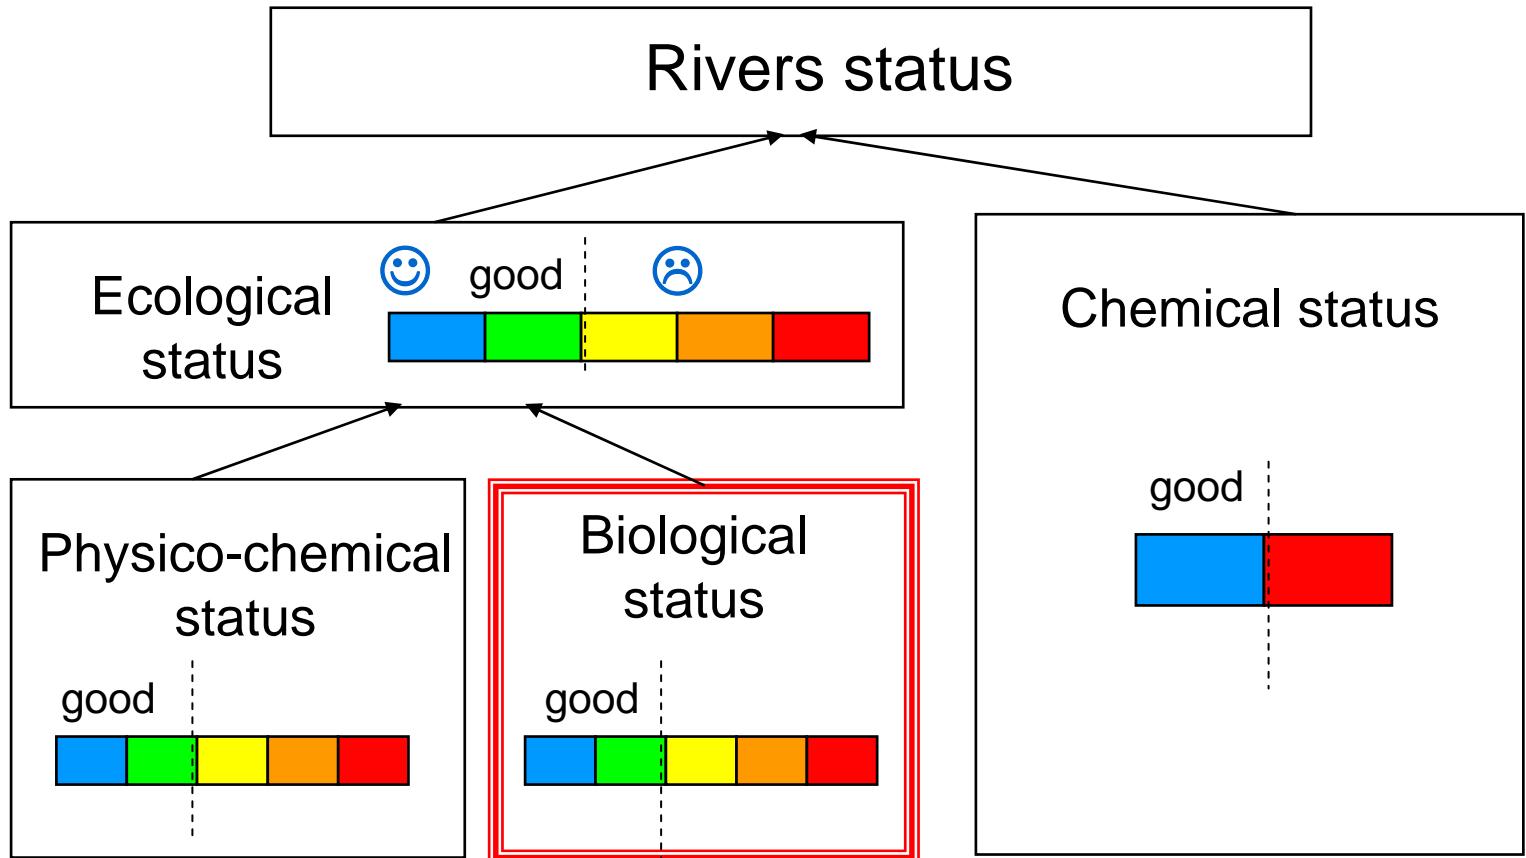

- Clear objectives : to reach or maintain the good ecological status by 2015 for surface water bodies and groundwater bodies ; to stop discharge of priority hazardous substances.
- A strict schedule with a deadline : 2015. Derogations should be economically and technically justified.
- Planning tools : programme of measures and management plan (SDAGE)
- Local authorities and public consultation will be implemented during all the WFD process

NORMANDIE

What is the Biological status ?

The Biological status is evaluated thanks to bioindicators :

- Fishes
- Macroinvertebrates
- Diatoms
- Macrophytes
- ...

eau
seine
NORMANDIE

The diagnostic

- The Biological status depends on the diversity and the quality of natural habitats
- There is a risk of non achievement of good status for 50 % of Seine-Normandy rivers because of current bad quality of habitats

Why ?

eau

NORMANDIE

Historic weight of human activities

The aims of our « rivers policy »

- To maintain and protect the last « natural » rivers
- To regain and restore modified rivers by diversifying aquatic habitats
- To restore ecological connectivity (organisms, sediment transport...)

Ministère de l'Écologie
et du Développement Durable

The Water Agency action programme (2007-2012)

- Increase « rivers » budget by about 140 %
- Majorate our financial subsidies rates
- Require natural habitat actions in every « water treatment » programmes
- Increase our technical support to favorise local stakeholders' mobilization
- Increase public awareness of protecting and restorating the rivers

ENSEMBLE

Agence de l'eau

River management in accordance of sustainable development principles

- Conciliate WFD environmental aims with the national commitment to reduce emission of greenhouse gases (transport by navigation, hydro-electricity, biofuels...)
- Conciliate protection of nature with the socio-economic issues (harbour and industrial development, tourism, leisure...).

Ex : during 2006 we created 600 jobs for daily river management
